PROJECTS

Blue Crates

Blue Crates is an on demand, full service storage service built with Rails and JavaScript. This app allows customers to request deliveries and catalog their items. Payments are made through Stripe.

Rampart

Rampart is a Rails app for searching and reviewing businesses that do not discriminate against the LGBT community. Rampart uses the Searchkick gem for smarter searches.

Merlot's Art

Merlot's Art is a wine and art experience. Customers can browse and purchase experiences. Payments handled by Braintree.

Second Lead

Second Lead is a social app that allows users build and share lists of shows they have watched or want to watch. The front-end uses AngularJS 1.5 with a Rails back-end.

Trackmap

A social networking app to track trips on a map using Mapbox. On Trackmap users can follow and track their friends as they travel around the world. Find places via the Google Places API.
