- Sass, Bootstrap & Foundation
- PostgresSQL

PROJECTS

Blue Crates
An on demand, full service storage service built with Rails and JavaScript. This app allows customers to request deliveries and catalog their items. Payments are made through Stripe.

Merlot's Art
A wine and art experience. Customers can browse and purchase experiences. Payments are handled by Braintree.

Drama Stash
A social app that allows users build and share lists of shows that want to watch. The front-end uses AngularJS 1.5 with a Rails back-end.

Rampart
A Rails app for searching and reviewing businesses that supports the LGBT community. Rampart uses the Searchkick gem for smarter searches.
